SPECIFICATION GUIDE

SPECIFICATION GUIDE

This specification guide was designed to outline the main considerations that need to be made when quoting or ordering a system.

Please use this along side with the ⚡ | Electric Technical Guide's. There is a guide for Silent Gliss • Somfy • Lutron system options which deal with specific details of those systems.

If any questions arise please call your local sales representative or contact The Bradley Collection directly.

Electrical installations must be carried out by qualified professionals. In line with the relevant wiring diagrams and conform to local regulations.

Tracks Page 24-38

Tracks are manufactured to suit individual requirements. When calculating the length of your track, remember to allow tolerance beyond the width of the frame for the curtains to draw back to the edge of the window.

Maximum track length in one piece 3.0m (118")*.

Tracks exceeding the recommended maximum distance between brackets, will be cut into equal parts unless otherwise specified.

Track joiners will be supplied. Brackets should be placed at every join.

The overall track cost is rounded up in 300mm (1ft) increments.

HAND DRAWN

For windows or double treatments where motorisation is not required, hand drawn option are available.

CONFIGURATION

A looped driving belt runs around the motor and along the track. This is attached to the pilot header which in turn is attached to the lead glider/roller. The motor operates in both directions, thereby opening and closing curtains.

SINGLE STACK

On single stack systems the motor is always positioned on the stacking side, allowing the motor to be hidden behind the curtain.

Double Stack

Double stack curtains can have the motor positioned at either end of the track.

END HOUSINGS

Nylon end housings are painted in a complementary colour and then concealed within shaped metal covers, coated to match the track exactly. The images below show the different end housing type, which vary between system type and configuration.

JOINING TRACKS

Where ever there is a join in the systems, this must always be supported by a bracket.

A joiner sits under the bracket and slides into the top channel of the track. To keep the two parts securely together

Note: On 5600 systems the bracket needs to be offset from the join.

BESPOKE BAYS

Bradley's bespoke service allows tracks to be specifically made for unique bay windows and complex long span installations. Tracks can be shaped to create a system that follows contours. Passing rings have been designed to traverse over brackets and around bends. Using a double track system in a bay window can create an elegant as well as practical treatment.

BRADLEY PROJECTS

Bradley Projects is an innovative digital tool kit to help with project planning, consisting of a Smartphone Survey App and an online Web Portal.

www.bradleycollection.com/projects/

Survey Tool

Available as a smartphone app for iOS or Android, Bradley Projects Survey Tool lets you photograph and dimension all window types and incorporates Bradley's clever check technology for bays and curves. Unlimited measurements may be saved locally to your device, shared to your colleagues or uploaded to your online account.

Single Brackets

Linear can be customised to suit virtually any window. For simple projection changes between the Minimums and Maximums listed below brackets are charged at double their standard costs. For all other customisations an additional custom fee is applied per drawing

Custom Projection

Specify the exact projection needed.

Custom Fixing Plate

Relevant where space is restricted or weight is a concern.

Uplift

Helps negotiate cornice and similar architectural features.

Ceiling Brackets

Specify exact projection required from ceiling.

Angled Brackets

The solution for tight and awkward locations.

Minimum & Maximum Bracket Projections

Dimensions outside of these stated min/max projections may still be possible but will generate a design charge per drawing. See pricelist for details

Note the custom projection brackets design will be different from the standard design.
