FLOAT

Poles are cut, bent and curved to suit individual requirements. When calculating the length of your pole, remember to allow tolerance beyond the width of the frame for the curtains to draw back to the edge of the window.

Maximum pole length in one piece 4.0m (157").

Poles exceeding the maximum length will be cut into equal parts unless otherwise specified.

Joining system will be supplied. (See page 5) Brackets should be placed at every join.

Ø30mm (1 3/16") • 38mm (1 1/2")

The overall pole cost is rounded up in 300mm (1ft) increments.

Diameter	Maximum distance between brackets	Minimum bend radius
Ø30mm (1 3/16")	1000mm (39")	R300mm (12")
Ø38mm (1 1/2")	1000mm (39")	R400mm (16")

PROVIDING POLE LENGTHS

Pole lengths can be specified in two ways.

OPTION A is our preferred method. This covers Pole length only. **OPTION B** combines pole and finial lengths.

*Section lengths over 2.4m (94") will incur a handling charge ☼ Acrylic poles should not be positioned in direct sunlight, and are not suitable for use in conservatories or outdoors

FLOAT

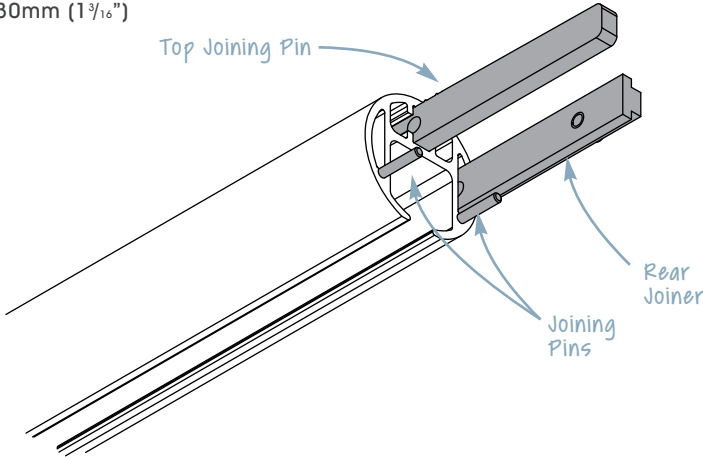

JOINTING SYSTEM

Float's jointing system ensures perfect alignment between pole sections.

Joints must always be supported by a bracket.

30mm (1 3/16")

38mm (1 1/2")

Bradley's bespoke service allows poles to be specifically made for unique bay windows and complex long span installations. Poles can be shaped to create a system that follows contours.

! Return bends are not available.
