

MIO

THE **BRADLEY**
COLLECTION

SPECIFICATION GUIDE

SPECIFICATION GUIDE

This specification guide was designed to outline the main considerations that need to be made when quoting or ordering a system.

If any questions arise please call your local sales representative or contact The Bradley Collection directly.

Poles Page 31-37

Brackets Page 38-56

Rings Page 57-60

Accessories Page 61-66

Poles are cut, bent and curved to suit individual requirements.
When calculating the length of your pole, remember to allow tolerance beyond the width of the frame for the curtains to draw back to the edge of the window.

Poles exceeding the recommended maximum distance between brackets, will be cut into equal parts unless otherwise specified.
Pole joiners will be supplied. Mid or passing brackets should be placed at every join.

Pole diameter's - Ø12.5mm (1/2") • 19mm (3/4") • 25mm (1") • 38mm (1 1/2") • 50mm (2")
The overall pole cost is rounded up in 300mm (1ft) increments.

Ⓢ Section lengths over 2.4m (94") will incur a handling charge

PROVIDING POLE LENGTHS

Pole lengths can be specified in two ways.
OPTION A is our preferred method. This covers Pole length only. **OPTION B** combines pole and finial lengths.

Poles are cut, bent and curved to suit individual requirements.
When calculating the length of your pole, remember to allow tolerance beyond the width of the frame for the curtains to draw back to the edge of the window.

Maximum pole length in one piece 4.0 (157")*.
Poles exceeding the recommended maximum distance between brackets, will be cut into equal parts unless otherwise specified.
Pole joiners will be supplied. Mid or passing brackets should be placed at every join.

Pole diameter's - Ø25mm (1")
The overall pole cost is rounded up in 300mm (1ft) increments.

Size	Recommended curtain type for pole diameter	Maximum distance between brackets	Maximum length in one piece	French Pole Bend radius
Ø25mm (1")	Medium weight, lined & interlined curtains	2000mm (79")	4000mm (157")⊕	R75mm (3")

⊕ Section lengths over 2.4m (94") will incur a handling charge

PROVIDING POLE LENGTHS

Pole lengths should be specified between bracket centres.

*Section lengths over 2.4m (94") will incur a handling charge

SINGLE FRENCH POLE
100MM (4") PROJECTION

140MM (5 1/2") PROJECTION

DOUBLE FRENCH POLE
FRONT 160MM (5 1/2") PROJECTION BACK 60MM (2 3/8") PROJECTION

JOINING POLES

Joins must always be supported by a bracket.

BESPOKE BAYS

Bradley's bespoke service allows poles to be specifically made for unique bay windows and complex long span installations. Poles can be shaped to create a system that follows contours. Passing rings have been designed to traverse over brackets and around bends. Using a double pole system in a bay window can create an elegant as well as practical treatment.

One Bend Bay

Two Bend Bay

Square Bay

Four Bend Bay

Continuous Curve

BRADLEY
BAY CHECKER | +

Bay Checker + is part of our Digital Toolbox, allowing you to check your measurement for bays and curves whilst onsite, as well as storing straight window dimensions for your projects.

Unlimited measurements may be saved locally to your device or shared to your colleagues.

Available as a free download for iOS or Android,

For more information on Bay Checker + and latest enhancements to our Digital Toolbox visit

www.bradleycollection.com/digital-toolbox/

The table below is a guide for the minium wall size required to fit a bend into the space.

Standard bend radius show is the minium radius achievable.
Projection shown for return bends, is the minimum requirement to clear the corner at point **A**.

Note: changes in angles and projections will alter the minimum wall sizes required

135° BEND ANGLES

Diameter	Return 1-A	Wall A - B	Wall B - C	Standard Bend Radius	Projection

The information below shows the relationship between the bracket backplate. this will enable easy alignments during instalation.

SINGLE BRACKETS - $\varnothing 12.5\text{mm}$ ($\frac{1}{2}''$)

SINGLE BRACKETS - 19mm ($\frac{3}{4}''$) • 25mm ($1''$)

SINGLE BRACKETS - 38mm ($1\frac{1}{2}''$) • 50mm ($2''$)

DOUBLE BRACKETS - FRONT $\varnothing 25\text{mm}$ ($1''$) BACK $\varnothing 19\text{mm}$ ($\frac{3}{4}''$)

DOUBLE BRACKETS - FRONT $\varnothing 38\text{mm}$ ($1\frac{1}{2}''$) BACK $\varnothing 25\text{mm}$ ($1''$)

Passing brackets and passing rings allow drapes to traverse around bays and multi-pole systems. passing is available on single pole systems. Passing will only work if the system is correctly installed and the drapes are properly made and attached to the rings.

PASSING GUIDELINES

1. Do make sure the top of the drapery ends underneath the main ring and does not touch or go above the bottom of the ring.
2. Always have the drapery hook perpendicular to the ringlet. Ringlets should not be sewn into a pinch pleat.
3. Be sure to have very little to no puddle on drapery, especially if the fabric is stiff. A stiff header can also cause the rings to not move freely.
4. If using lightweight or sheer fabric, the fabric needs to be weighted enough to pull the rings into the correct passing position.
5. Passing rings are not recommended with draw rods.

Mio can be customised to suit virtually any window. For simple projection changes between the Minimums and Maximums listed below brackets are charged at double their standard cost. For all other customisations an additional up-charge and custom fee is applied per drawing,

Custom Projection

Specify the exact projection needed.

Custom Fixing Plate

Relevant where space is restricted or weight is a concern.

Uplift

Helps negotiate cornice and similar architectural features.

Angled Brackets

The solution for tight and awkward locations.

MINIMUM & MAXIMUM BRACKET PROJECTIONS

Dimensions outside of these stated min/max projections may still possible but will generate a design charge per drawing. See Price List for details

Diameter	Type	Standard Projection(s)	Minimum Projection	Maximum Projection
Ø12.5mm (1/2")	Side	40mm (2 3/8")	31mm (1 1/4")	100mm (4")
Ø12.5mm (1/2")	Mid	40mm (2 3/8")	31mm (1 1/4")	100mm (4")

DOUBLE SYSTEM - FRONT Ø25mm (1") BACK Ø19mm (3/4")

DOUBLE SYSTEM - FRONT Ø38mm (1 1/2") BACK Ø25mm (1")

SINGLE FRENCH SYSTEM - ø25mm (1")

DOUBLE SYSTEM - FRONT 25mm (1") BACK 19mm (3/4")

The 25mm (1") drapery arm, offered in all the available finish options, is designed to work with dormer windows, doorways or above beds.

The drapery arm has a levelling adjustment and light Weight finials and fabric are suggested.

The maximum recommended arm length is 1000mm (3'4").

All poles and components may be specified in this stunning palette of colours and finishes, with a choice of coat options throughout.

SHADES

A superb selection of opaque colours, all available in a choice of Matte, Satin or Gloss finish.

COAT OPTIONS

METALLICS

High metallic fleck coatings with all available in Satin and Gloss sheen levels.

COAT OPTIONS

ANODICS

A flat metal colour group, with an anodised style surface texture.

STAINLESS

Brushed stainless steel, self-coloured or in subtle tinted hues gives an industrial aesthetic.

PLATED

Polished plated finishes provide a traditional sense of luxury.

CUSTOM FINISHES

Can be specified from RAL K7 finish chart, subject to a per colour upcharge, which covers up to five poles. See pricelist for further details

COLOUR MATCHING

A colour matching service is offered, to match your scheme of fittings perfectly . See pricelist for further details
